WORK HISTORY

Full-stack developer (1/2020 to present)

Bookwell

Responsivities:

- Developing new and customization of the existing features for the high-profile web application using ReactJS.
- Develop and fix the application's defect base on requirements.
- Refactoring old components to use new cutting-edge technologies
- Debug code and profile system performance to troubleshoot functional and nonfunctional issues

Software engineer intern (11/2019 to 12/2019)

Sleeping duck

Responsibilities:

- Capturing the best development practices in a way of common condign standards team of 4 developers that helped to decrease code complexity and improve maintainability of the shared libraries and components.
- Performing unit & load testing for the high-profile customers-facing portal applying knowledge of RSpec eliminating system's failure rate by 79%.

PROJECTS

Project: Recipe Application (7/2019 to 8/2019)

- **Project Description:** Using pure JavaScript ES6 to fetch and manipulate data from an open API. This application allows users to search for recipe that they want to. Moreover, users can also save the recipe they like and add ingredients to the shopping list.
